The theory of Limebook:

1. CPU: The CPU is a central processor, adopted MPC5121e. Main frequency is 400MHz.
2. Hard disk: is a SSD card. Its maximum data capacity is 8GB, and the data reading rate could be up to 66Mbps.
3. Memory: Its maximum data capacity is 256MB, and the data reading rate could be up to 400Mbps.
4. Power Circuit: To provide steady power to around circuit.
