USING YOUR WiFi SPX8WF

1. EXTERNAL MEMORY CARDS – Simply insert your memory card into the memory card slot and/or the USB drive into the USB port located on the side of the frame. The frame will automatically start a picture slide show. The frame supports the following memory cards: Compact Flash (CF), Secure Digital (SD), Secure Digital High Capacity (SDHC), MultiMedia Card (MMC), Memory Stick (MS, MS Pro, MS Duo), and xD Picture Card.

2. VIEWING YOUR PICTURES – To view pictures from the internal memory, USB flash drive, or memory cards, from the **Main Menu**, highlight “**My Photos**” on the left pane, and press **OK**. Using the **Right** or **Left** buttons highlight the icon for Internal Storage, CF Card, Flash Card (SD, MS, xD), or USB Flash and press **OK**. Thumbnails of all available images and folders will appear. Select an image and press **OK** or the **Slideshow** button on the remote to start a picture slideshow. While in thumbnail view press **Menu** to copy or delete pictures.

3. LISTENING TO YOUR MUSIC – To play MP3 or WMA files on the frame, from the **Main Menu** highlight “**My Music**” on the left pane and press **OK**. Select your memory type and press **OK**. A list of available MP3 or WMA files will appear, select the song and press **OK**. To view a full-screen slideshow with music, press **OK** again. Use **Vol+** and **Vol-** to increase or decrease volume. Press **Up** or **Down** to skip to the next song.

4. RETRIEVING EMAILED PICTURES - Press the **Email** button on the remote to manually retrieve emails. The frame will check for new emails. The frame will automatically display a slideshow of the emailed pictures after receiving and saving the pictures in the appropriate folders. The frame will prompt you to Accept or Reject any new email addresses, and keep this information stored for friendly email addresses on the frame.

5. VIEWING EMAILED PICTURES – Hit the **Home** button on the remote control to go to the **Main Menu**. Select “**My Emails**” on the left pane, press **OK**. Press the **Down** button to select “**Inbox**” and press **OK**. A thumbnail view of folders will appear for each person that you have received mail from. Select a folder and press **OK**. A thumbnail view of pictures in the selected folder will appear. Press **OK** or **Slideshow** button to start a picture slideshow.

6. CONNECTING TO YOUR WINDOWS LIVE™ COLLECTION – By default your frame is already set up to receive a daily feed of Windows Live Framelt Collection. Windows Live Framelt is a service provided by Microsoft to share your pictures, stay up-to-date with weather, news, traffic and much more. To get a preview of what you get with Windows Live, go to the **Main Menu** on your frame (wireless network must be connected), select “**Windows Live**”, press **OK**. Select the **Framelt** icon and press **OK**. You will see a thumbnail view of folders for the different collections, select one and press **OK**. The frame will load the latest images from Windows Live and display a slideshow of these images on your frame. Visit <http://frameit.live.com> for additional information on Windows Live Framelt. Refer to the User Manual for details on how to register your own Windows Live account with your frame. The model number usually begins with “SP”.

5. A new window will open, locate the **SETUP** file and double click it.

6. Follow the on-screen instructions to complete the installation.

After the software is installed on your computer, remove the **SETUP** file from the frame’s internal memory to allow more room for pictures. You can move the **SETUP** file to your hard-drive if you’d like or simply delete it.

DESKTOP SOFTWARE INSTALLATION

Smartparts Desktop Software is designed to help you find, optimize and transfer pictures into the frame.

Things you can do with the desktop software:

- Wirelessly transfer pictures from your computer to the frame
- Register your Windows Live Framelt account on the frame
- Correct picture orientation and red eye
- Enhance/sharpen picture quality
- Scale down file size to maximize storage capacity
- Apply Smart Fit to increase the viewing area on the frame

IMPORTANT SAFETY PRECAUTIONS

Always follow these basic safety precautions when using your digital picture frame. This will reduce the risk of fire, electric shock, and injury.

WARNING: To reduce the risk of fire or shock hazard, do not expose this product to rain or moisture.

WARNING: To prevent the risk of electric shock, do not remove the cover. There are no user-serviceable parts inside. Refer all servicing to qualified personnel.

HOW TO INSTALL
The software’s installation file is preloaded on the frame’s internal memory. To install it on your Windows computer follow these easy steps:

1. Power the frame **OFF**
2. Connect the frame to your computer using the supplied USB cable
3. Power the frame **ON**, wait 5 – 10 seconds for the computer to recognize the frame as a new device.
4. On your computer, go to **START** menu and select **MY COMPUTER**. **MY COMPUTER** window will appear on the screen, double-click on the drive label that matches the model number of your frame. Visit <http://frameit.live.com> for additional information on Windows Live Framelt. Refer to the User Manual for details on how to register your own Windows Live account with your frame.
5. A new window will open, locate the **SETUP** file and double click it.
6. Follow the on-screen instructions to complete the installation.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:
(1) this device may not cause harmful interference, and
(2) this device must accept any interference received, including interference that cause undesired operation.

This Class B digital apparatus complies with Canadian ICES-003

For additional features and details please refer to the User Manual located on the Smartparts website, www.sp8wifi.com.

SPX8WF WiFi DIGITAL PICTURE FRAME SETUP GUIDE

PREPARING FOR INSTALLATION

WHAT'S INCLUDED

- Smartparts 8" WiFi Digital Picture Frame (SPX8WF)
- Remote Control
- Stand
- Power Adapter
- Setup Guide
- Smartparts Desktop Software
- USB cable

GETTING STARTED

OK/4-way rocker Switch
Power ON/OFF
Menu/Exit
CF Cards
USB Host
SD/xD/MMC/MS Cards
USB Device
DC Input jack

REMOTE CONTROL

POWER ON THE SPX8WF

ATTACH THE STAND OR WALL MOUNT

Your frame can be placed on a tabletop or any flat surface by attaching the stand supplied. Simply align the round knob part of the stand to the round hole on the back of the frame and slide the stand in place. The stand can rotate 90 degrees if you like to set your frame vertically. The frame can also be hung on the wall.

SETUP WIZARD

1. Press **OK** to start the Setup process.

Set Up Now
Press **OK** to setup wireless connection
Or press **i** to enter manually

Set Up Later
Press **Exit** to set up later

This setup wizard will walk you through setting up your wireless network connection to the frame.

2. **Current Time & Date**

Set time...
Hour: 09, Minute: 38

Set date...
Year: 2008, Month: 09, Day: 29

Press the **Up** or **Down** buttons to change the hour, press the **Left** or **Right** buttons to jump from hour to minute. Press the **Right** button to jump down to set the date. Use **Up** or **Down** to change the numbers and **Left** or **Right** to jump from year to month to day. Press **OK** when you have completed setting the date and time.

3. **WiFi and Clock Setup Wizard**

Welcome to the Smartparts SyncPix8 WiFi Frame
Note: It is highly recommended that both DHCP and SSID Broadcast are enabled on your home network for a quick and easy setup. If not, you can manually enter the network settings and/or the SSID of your wireless network by pressing the "i" (info) button on the remote control. You can also exit the setup wizard and go to Main Menu/Settings/Network.

Press **OK** to scan wireless AP automatically
Or press **i** to enter manually

Congratulations!!!
Your wireless connection has been successfully set up.
To start using your SyncPix 8 WiFi-Frame ...
Please install PC utility to help you to use your SyncPix 8

Press **OK** to main menu

4. A list of available networks will appear on the right pane. Using the **Up** or **Down** buttons select your preferred wireless network and press **OK**.

5. The frame will connect to your selected network. If the wireless network you are connecting to is using wireless security you will be prompted to enter the security key. Using the arrow keys on the remote control, select each letter or number and press **OK** on the remote. Once you complete entering all the characters, highlight **OK** and press **OK** on the remote. Allow about a minute for the frame to connect to your wireless network.

SETTINGS

Network – Setup wireless networking, any of the methods: by scanning for available networks, manually entering your network information, Enter Internet protocol (TCP/IP) or WiFi Protected Setup (WPS).

Account Manager – Manages your "friendly" email address book, accepted and blocked email addresses.

Slideshow – Set slideshow transition time, transition effects and order in which the slideshow should play.

Music – Set volume control and play order (sequential, repeating, repeat all, shuffle)

Screen Saver – Select a screensaver for your frame to show calendar, automatically play slideshow or leave it off.

Date, Time, Sleep and Alarm – Set date, time, auto power off options and alarm on/off.

Brightness – Set the brightness level for your frame.

Frame Name – Enter a personal frame name.

Information – View basic information about the frame's firmware version, serial number, frame name, wireless network, internet status, and Email Address.

Setup Wizard – Walks you through initial setup process for wifi connection.

Settings Reset – Restores the frame to factory defaults.

Federal Communication Commission Interference Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

FCC Caution: Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate this equipment.

IMPORTANT NOTE:

FCC Radiation Exposure Statement:

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator & your body.

This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.
