

Hello Mr. Johnson:

About the comments of the FCCID: WQ2MTSIR321

1) FCC ID must be preceded by "FCC ID:". Currently label shows "FCC id:". Please correct. Additionally the device is of such size that the FCC 2 part statement of 15.19 (a)(3) should also be on the label. Please correct.

We have uploaded a new label document.

2) Given the intended design/use for the device, was it tested in an upright position? It would seem due to its use this would also be a typical positioning. Worse case should be selected for final testing.

The device aligned with a LCD display, and the LCD display can be an upright position or a horizontal position. We have tested two positions and the horizontal position is the worse case.

3) Kindly add a statement or explain the traceability of the test equipment used. Was all equipment calibrated traceable to (i.e. NIST or similar).

Please see the next table of the traceable:

All the equipments were calibrated by Jiangsu Electronic Information Products Quality Supervision & Inspection Research Institute which is traceable to NIST.
