

Justification for Re-use of radio test results

We, Autel Intelligent Tech. Corp., Ltd., believe that the conducted signal tests for wifi module **AP6212** in the original reports for model MaxiSys MS906BT can be re-used for the current model MaxiCOM MK906BT, as the following reason:

The difference between them is that the new design of MaxiCOM MK906BT to integrate with new BT module.

This change not affects wifi in conducted signals.
