RE: Phonic Ear A/S

FCC ID: WRX-PE-HA-R

I have a few comments on this Application. Depending on your responses, kindly understand there may be additional comments.

- 1.) Your existing Block Diagram is insufficient. Please provide a functional block diagram of this product. For your reference, a proper Block Diagram should mirror the Schematic and Operational Description, and provide a clear picture of the signal pathways and interconnections of all oscillators, modulators and amplification circuits.
- 2.) Please provide an Operational Description of this device. Please describe how this product creates, modulates and amplifies RF energy for use in communications.
- 3.) In general, FCC prefers to see MPE exhibits created and uploaded to FCC as a separate document instead of buried inside the Test Report. If possible, please provide MPE separately.

William H. Graff  
President

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information may result in application termination. Except as described in §0.459, correspondence and responses should be considered part of the permanent submission and may be viewed from the Internet once a Grant of Equipment Authorization is issued.

Please do not respond to this correspondence using the email reply button. In order for your response to be processed expeditiously, you must submit your documents through the AmericanTCB.com website. Also, please note that partial responses increase processing time and should not be submitted.

Any questions about the content of this correspondence should be directed to the sender.
