Modular Approval Request

FCC Id : WT5-5188

The following attestation addresses the requirements to support modular approval:

Modular approval requirement	Yes (provide brief statement)	No *
(a) The radio elements must have the radio frequency circuitry shielded. Physical components and tuning capacitors may be located external to the shield but must be on the module assembly.	Yes The module includes shielding	
(b) The module must have buffered modulation/data inputs to ensure that the device will comply with Part 15 requirements with any type of input signal.		No Module has buffered input outputs Excessive data rates has no effect on Compliance Host should also not overload module
(c) The module must contain power supply regulation on the module.		No Module should be supplied by host, limitations indicated in DataSheet (Operational 1.9 to 3.6 V Absolute -0.3 to 3.96 V)
(d) The module must contain a permanently attached antenna, or contain a unique antenna connector, and be marketed and operated only with specific antenna(s), per Sections 15.203, 15.204(b), 15.204(c), 15.212(a), 2.929(b)	Yes Meet the antenna requirements of sections 15.203, 15.204(b), 15.204(c), 15.212(a), 2.929(b)	

(e) The module must demonstrate compliance in a stand-alone configuration		No Module is designed and must be used only in EnerSys products : -Interface: IQ transceiver
(f) The module must be labelled with its permanently affixed FCC ID label, or use an electronic display (See KDB Publication 784748 about labelling requirements)	Yes FCC Id : WT5-5188	
(g) The module must comply with all specific rules applicable to the transmitter. The grantee must provide comprehensive instructions to explain compliance requirements	Yes	
(h) The module must comply with RF exposure requirements	Yes This device must be installed to provide a minimum of 20cm between the device and people	

* Please provide a detailed explanation if the answer is "No."

Yours sincerely,
