Model : Play RGB I

Product Introduction

- ◆ Clarity, easy operation and an intuitive interface characteristics this new type of RGB remote control. outstandingly successful technical solution to this complicated problem.
- ◆ The round control panel facilitates quick and easy activation of the respective colour selection.
- ◆ The remote control is particularly suitable for use in bars, pubs , shops or anywhere where frequent colour changes are desired.

Technical Parameter

- ◆ Power Supply:
 - Input Voltage: 12-32VDC (RX)
 - 3.7V DC, 850mAh (TX)
- ◆ Transmission: RF
- ◆ Modulation type: FSK
- ◆ Frequency: 434.3MHz
- ◆ Remote Distance: 20 meters
- ◆ Wireless
- ◆ Automatic parameter memory
- ◆ Totally:32768 kinds of color
- ◆ 256 step speed
- ◆ Can adjust the brightness from 0 to 100%
- ◆ Size for remote control: 126mm*55mm*16mm
- ◆ Size for receptor: 145mm*20mm*18mm
- ◆ Includes with 1.5meter length USB connecter
- ◆ It comes with rechargeable lithium batteries inside
- ◆ 1 years warranty

Application Sites

- ◆ Building Decoration: Business spaces, airports, subway;
- ◆ Indoor Decoration: Lighting and back lighting for hospital, hotel, marketplace, square, dining-room, pub and etc.;
- ◆ AD solid Word, sign and mark, signboard and billboard;
- ◆ Be used as big area back lighting source.

Play IV-KS-RGB-04

Receptor interface instruction

Wiring Diagram

General Instruction :

- a) Press ON/OFF button, the backlighting of controller will be on
- b) Controller need to “learn” the receptor first, click the learn button of receptor with a nib, indicator light on the receptor will be on. press any number “0-9” from number region in controller, and touch any color from color wheel, indicator light of the receptor you clicked will be flashing about 1-2 seconds, which means receptor already recognised the “Number” from controller. other receptors can be “Learned” in the same way.
- c) Max 10 Color for one Play I sender.
- d) The distance between receptors must be over 0.5 meter.
- e) There are 3 channel RGB control on the receptor, the max current of each channel up to 3 A, If it is not enough for power consumption, you can use data repeater to get synchronous changing signal.

- f) Remote controller will be in sleeping mode if no operation within 10 seconds. You need to activate on/off button for operate.
- g) After setting finished, keep the controller within 20 meters from receptor.

A. Single color setting :

- a) After on the controller, press any number from "0-9" on the sender, this mean the store the color. The wheel have three color, select the color and mix them together.
- b) Select color. The last position is the color you choice..

B. Multi color gradually change setting:

- a) First Press "P" (Program- P have the function to keep the memory when your finger press the color wheel in the circle)

- b) Select your favorite color store. Such as 5.6.7, then press P.
- c) Press “<“ or “>“ between “M”, you can control the speed for the lighting flash.
- d) Brightness can be changed by +/-
- e) The system is simply activated by the on/off key, this shall also recall the last color scene when re – activated.

Warning:

The hand held controller is operated by light touch only. Heavy pressing or using sharp or solid objects is not recommended as this could damage the unit. In case the system does not respond to selections made, simply check batteries, the RED led will flashing in remove controller if power is empty. Batteries can be recharged by computer or recharger. After recharging finished. the Blue LED will OFF.

Do not submerge the hand held controller in water or allow any liquid to come in contact with it, as this will damage the unit unusable. The hand held controller can be cleaned by using a damp cloth only.

To achieve good performance for the battery. The idea charging time is about 12 hours at the first three times.

Manufacturer is not responsible for the bad quality and damage caused by open the device without permission.

FCC ID:

This device complies with part 15 of the FCC rules, Operation is subject to the following two conditions:
(1) this device may not cause harmful interference ,and
(2)interference received, including interference that may cause undesired operation.

This equipment has been tested and found to comply with the limits for a Class

B digital device, pursuant to Part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and if not installed and used in accordance with the instructions, may

cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try correct the interference by one or more of the following measures:

Reorient the receiving antenna.

Increase the separation between the equipment and receiver.

Connect the equipment into and outlet on a circuit different from that to which the receiver is connected.

Consult the dealer or an experienced radio/TV technician for help.

Any special accessories needed for compliance must be specified in the instruction manual.

You are cautioned that changes or modifications not expressly approved by the party responsible for compliance could void your authority to operate the equipment.
