

### **Circuit Description**

MA6221-S7K encode the mouse button data and mouse movement X and Y coordinates data and passes them to RF circuit in it. The RF circuit transmits these data to the Receiver. MA6221-S7K use work clock Frequency 76.8KHz crystal. RF circuit use a 27.042MHz crystal. MA6221-S7K IC has DC/DC power processor in it.
