

## 1 Profile

TS-NC380M tag is active active tags, tag will take the initiative to send card number and status information to reader . The tag is based MicroTag embedded operating system which for active tag appropriate, and the tag is integrated i-Power intelligent power management technology, making TS-NC380M smart tag very power saving. The built-in lithium battery can sustainable work 2 years.

TS-NC380M tag work at 2.4 GHz ISM band, you can use free of charge, without the need for the use of wireless spectrum licenses.

TS-NC380M Tag can be stucked on the object surface, when the object be moved, or the tag be removed illegal, the tag will be send alarm signal.

TS-NC380M tag use LocNet patented localizer technology, can locate the tag's position.

## 2 Specification

<b>Rang</b>	>50M ( at visibility condition )
<b>Operation Temperature</b>	-40℃ ~ +85℃
<b>Operation Relative Humidity</b>	10% ~ 95%
<b>Frequency</b>	2.4GHz
<b>RF Power</b>	1mW
<b>Alarm Mode</b>	Shock / LED
<b>Battery Life</b>	>2 yesrs
<b>Weight</b>	20 g
