Re: Class 2 Permissive Change: FCC ID: WUS00036

Airpointe would like to request a Class 2 Permissive Change to grant FCC ID: WUS00036. The request includes adding a second enclosure type to the FCC ID: WUS00036 grant.

The current "hard" enclosure is a Cellcore ABS plastic housing. The requested additional enclosure type is a "soft" housing using Polyurethane laminate.

The reason for the addition of the "soft" enclosure is the reduction of thermal insulating characteristics of the housing which allows for precision temperature monitoring by the enclosed device.

Sincerely,

Bob Duggan
