主旨: Optelec B.V., FCC ID: WX8-ALVA BC640, Assessment NO.: AN09T9114, Notice#1

Hi Celine,

Please address following issues.

Q#1: Per Part 2.926, FCC ID format can't have space. Please update the FCC ID and related documents.

Ans.: I had revised the FCC ID number and related documents, please see the additional files.

Q#2: According to the user manual, The ALVA BC640 consists of an ALVA BC640 base unit and an optional Braille Audio Feature Pack. But the EUT internal photos only included BC640 base unit. Please provide complete EUT internal photos.

Ans.: For this application, we only apply to Braille Audio Feature Pack, the ALVA BC640 base unit is not including, I had delete ALVA BC640 base's photo and revised the test report
about ALVA BC640 base description and also updated the related exhibits, please see attached file.

Q#3: According to the block diagram, both BC640 base unit and audio feature pack have incorporated with a BT module. But look into this application, most information provided are for BC640 base unit. How about the audio feature pack? Please explain.

Ans.: As mentioned above, this application only applies to audio feature pack. As for the BC 640 base unit, the Bluetooth module inside was a certified module under FCC ID: POOWML-C40. Because the output power for both transmitters are lower than 60/f(GHz) that SAR evaluation for both are not required.

Best Regards,
Lucy Tsai
