

Lable Location Info

FCC ID: WZ7-W151

Due to the very limited space on the RF shielding cover, the FCC ID cannot be affixed on a single row and in a readable size (min font size point 4). Instead, the company name with company logo and the model name is only applied. This approach is already applied by the original Grantee “u-blox”.

The applicant “Alltek Marine” confirmed, that this RF module is only used for the integration into their own final host devices marketed under the brand “AMEC” and therefore not subject to marketing the RF Module alone to any 3rd party.

The final host devices will be labelled “Contains FCC ID: WZ7-W151”.

TOP SIDE (Example)

RF Module W152 with onboard Antenna (lable size approx. 7.5 x 7.5 mm)	RF Module W151 with RF-PIN/Antenna-Trace-Design (lable size approx. 7.5 x 7.5 mm)
