HOW TO USE:

1. Turn on your Wii™ Console and synchronize Wii™ Remote with your Wii™ console.
2. Connect the receiver of Wireless controller plus into Wii™ Remote. The RX LED indicator flashes.
3. Turn on power switch of the controller to ON position. The LED indicator flashes blue. Press SYNC button of the controller. When the receiver receives the signal from the controller, the LED indicator of the controller indicates flicker-free blue light.
4. You are ready to play.

POWER SAVE (SLEEP MODE)

1. In order to save power and prolong batteries life, the Wireless controller plus features a Power Save mode:
 - A. Press SYNC button for 3 seconds in any case, the Wireless controller plus will enter sleep mode.
 - B. When the receiver receives the signal from the controller but the If the wireless controller is left to idle for 5 minutes, the controller will enter sleep mode.
 - C. If the receiver cannot receive the signal from the controller for more than 1 minutes, Wireless controller plus will enter sleep mode.
2. To exit the Sleep mode you can press SYNC button, Z button or C button. Then you can continue your gaming control.

HOW TO RECHARGE

When the power of the Wireless controller plus is low, the LED on the controller will be obviously darker than normal. This indicates the controller needs to be recharged.

1. To recharge the controller, please output DC5V/500MA through the included USB cable into the controller or use any other power adapter of the same standard.
2. Connect the USB recharge cable with the charging plug of the controller. The LED indicates flicker-free red light.
3. When the recharge is finished, the flicker-free red light will be extinguished.

When recharging, you must stop gaming and power button of the controller must be OFF.
