

# Description

## 一、 Circuit description

Transmitter power DC3V by battery , ASK Modulation ,

Frequency:433.92MHZ , RF Part Mainly by the crystal oscillator frequency stabilization and High-frequency signal amplification components , The two groups by the high-frequency data channel codec Number sent to the receiver.

## 二 : Parameter Description :

- 1、 Voltage : DC3V.
- 2、 Current : 6MA.
- 3、 Frequency : 433.92MHZ.
- 4、 Modulation : ASK.
- 5、 Encoding type : Fixed Code.
