

<p>FCC ID: X4USPC</p> <p>Exhibit 2a: Revised Label/Location Info</p>
--

The device is used outdoors in field conditions. To provide protection, the device is encased in a rubber “boot” that may hide any label on the back of the device. More so, the device may be permanently attached to a stand preventing access to the back cover.

As suggested by FCC personnel, we determined the best location is in the battery compartment where the label will be protected from outdoors conditions and still frequently visible to the user.

Picture showing the FCCID label in the battery compartment

The Compliance information is included in the User Manual per FCC 15.19(a)(5).
