Subject: Application for a Class 2 Permissive Change to certified device
FCC ID: X5Y774-0850
Product Name: VS3000 GTW/806-870

Selex ES SpA, Via Tiburtina Km12.400, 00131 Rome, Italy, herein submits its application for a Class 2 Permissive Change to the certified Licensed Non-Broadcast Station Transmitter with FCC ID: X5Y774-0850

A. DESCRIPTION OF THE CHANGES:

The certification frequency range has been extended to 809-824 MHz (V+D), 854-869 MHz (DMO) in transmission and 854-869 MHz in reception.
Previous frequency range was respectively to 817-824 MHz (V+D), 862-869 MHz (DMO) and 862-869 MHz in reception.

No change, neither hardware nor software, has been made to the equipment.
The new band comes from change of FCC rules about TETRA certification. At the time of the original certification, it was not allowed to cover the entire TETRA band of the mobile, now it is allowed. However, the mobile was already able to cover the entire band, and the device band was restricted at configuration time (refer to Selex Programming Letter).

Best Regards
