

## Wireless Remote Control User Manual (WXD-189TX)

Thank you for your purchase of Phottix product and viewing this instruction manual, be sure to read and understand this manual and the instruction manual of the camera entirely before use, so that you can use it correctly and expertly. We will spare no effort to add oges to your photograph. You can realize the use method and precautions easily through this manual.

### 1. Product description:

Cleon is a remote control with radio frequency, it contains SAWF filter, has stable frequency, it needs one 23A 12V battery, the standby current is less than 4uA when it doesn't work, it has strong anti-interference ability, the transmitter and receiver adopt smart code setting, frequency pre-set in production. So you can use the remote instantly, it is very easy to operate. It can work within the working distance of 100 meters (without obstacles) with no interference. In order to adapt to the specific shooting environment.

### 2. Parts of product:

### 3. Specification:

- 1). battery: one 23A 12V battery
- 2). standby current: 4uA
- 3). max. distance: 100m (without obstacles)
- 4). frequency: 433.92Mhz

### 4. Operating Instructions:

#### 1). the usage of wireless remote:

- ① When the camera is off, switch the receiver to the ON position, take the 2.5mm cable to connect the 2.5mm socket of receiver and the shutter port of camera, after that, turn on the camera and the receiver;
- ② After the successful code setting (frequency pre-set in production. so you can use the remote instantly), the transmitter can control the receiver, press the release button, then it can control the camera's sets, such as single shot mode, 2 seconds delay, continuous, as well as bulb mode for long exposures.

#### 2) This is the description of the 3-way switch as follows:

- ① S/B: set to On position on receiver and 2S position on transmitter. Half-pressing shutter button on transmitter for focusing (both lights turn green) and fully pressing shutter button to take photo (light turns red). Fully press the button on transmitter for 3 seconds, the camera will have long exposure (The camera operates on B

mode),to end B mode,press fully the shutter button.
