

## **THE USE TIP**

1. The first is to check the electric appliance fitting and the frame of power line what linked/adhered the Lamps set.
2. The correct connect way: link both the Lamps set two side's line closely, and then pulls the power line from each side what in turn is Firing line and the zero line.
3. Put the Lamps set installed stably in the place where need it.
4. Put the tube installed in the Lamps set.
5. Turn off the power, and then step by step connect the Firing line and the zero line well.
6. Please check it again, and then turn on the power is ok!

### **FCC STATEMENT:**

This light device has been tested and found to comply with the limits for Consumer RF Lighting device, pursuant to Part 18 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

This product may cause interference to radio equipment and should not be installed near maritime safety communications equipment or other critical navigation or communication equipment operating between 0.45 – 30MHz.
