Subject: Short term confidentiality for FCC ID: XDZ-1013

Gentlemen:

The subject FCC ID was recently issued a grant of Certification with short term confidential treatment of certain documents required to be submitted to the FCC during the filing process. Unfortunately, due to a mix up at Daron LLC the request to extend short term confidential treatment of the specified documents was not timely filed. Daron LLC realizes that External Photos, Internal Photos, Test Setup Photos and User manual exhibits have been released to public accessible web site since Nov.15, 2009. However, we are requesting that short term confidentiality be reinstated at this time and continued till Jan. 31, 2010.

There has been no marketing of the product and no public information has been released as to the existence of the application for this new product by the company. The oversight of the need to continue the short term confidentiality occurred due to the company's focus on the FCC inquiry regarding separation distances and applicable transmission duty cycles for this class of device. The company's intention has always been to maintain short term confidential treatment of the available material until marketing of the device begins.

Sincerely

A handwritten signature in black ink, appearing to be 'AP', followed by a long horizontal line extending to the right.

Andrew Panaccione
President, Daron LLC
