Attn: Director of Certification

### **Request for Confidentiality – ISED Canada**

**ISED certification number: IC: 11881A-GT12BT**

Dear Director of Certification,

In accordance with [RSP-100 Issue 12](#) Paragraph 12.4, we formally request the permanent confidential treatment of the exhibits listed below. We ask that these exhibits be withheld from public review indefinitely due to their inclusion of trade secrets and proprietary information that are not customarily released to the public. The release of this information could cause significant harm to our company and provide undue advantages to our competitors.

**Permanent Long Term Confidentiality Request:**

**LTC General List:**

- Block Diagrams
- Operation Description / Theory of Operation
- Parts List & Placement / Bill of Materials (BOM)
- Schematics

**LTC Specific Equipment: none**

**LTC With ISED Permission<sup>3</sup>: none**

Furthermore, we seek short-term confidentiality (STC) for the exhibits specified below until the intended marketing date, which is 31-Dec-2024.<sup>4</sup>

**Short-Term Confidentiality Request<sup>1</sup>:**

- External Photos
- Test Setup Photos
- ID Label/Location
- Test Report
- RF Exposure Information

Our company has invested significant resources in the development of this innovative product, a pioneer in its field. Allowing competitors access to the detailed information would undermine the competitive edge we have worked hard to establish and could lead to considerable financial loss.

<sup>1</sup> - Tune up procedure is applicable only for licensed equipment.

<sup>2</sup> - The ISED rules require that any radio, in which the software is designed or expected to be modified by a party other than the manufacturer that would affect the operating parameters of frequency range, modulation type, maximum output power or other radio frequency parameters outside the range under which the transmitter has been approved in accordance with the ISED rules, must be certified as a software-defined radio (SDR).

We appreciate your attention to this matter and look forward to your favorable response.

Sincerely,

Kind regards

Signed by:

<sup>1</sup> - Tune up procedure is applicable only for licensed equipment.

<sup>1</sup> - The ISED rules require that any radio, in which the software is designed or expected to be modified by a party other than the manufacturer that would affect the operating parameters of frequency range, modulation type, maximum output power or other radio frequency parameters outside the range under which the transmitter has been approved in accordance with the ISED rules, must be certified as a software-defined radio (SDR).

<sup>1</sup> - Confidentiality requests for such exhibits should be directed to [certificationbureau-bureauhomologation@ised-isde.gc.ca](mailto:certificationbureau-bureauhomologation@ised-isde.gc.ca), including a clear justification for the request. This should be done prior to submitting the certification application to the TCB.

<sup>1</sup> - Exhibits marked for STC exceeding 180 days will require additional justification as per the certification application process.

<sup>1</sup> - Exhibits already under "Permanent" confidentiality do not require a repeat request under STC, as they will automatically become public after the designated period. The purpose of STC is to prevent public access to non-confidential exhibits until a planned event, such as a product launch, occurs.
