Subject: Attestation letter by Natus Neurology Incorporated
Regarding radio transmitter module FCC Identifier 'XM5-SMG2N2'

To Whom It May Concern,:

We, Natus Neurology Incorporated, have designed into our "Nicolet EEG wireless amp" a radio transmitter module FCC Identifier 'XM5-SMG2N2' manufactured by Connect One Ltd.

We attest that no changes have been made to the radio parameters or circuitry on board the Connect One module

If you have any questions or comments, please do not hesitate to contact me.

Sincerely,

A handwritten signature in blue ink that reads "Glen Hermanson".
