

### **Attestation Letter**

**I, the undersigned, attest the radio device of given application is a purely slave device without radar detection capability where the device can listen only without beacon, and does not support ad-hoc and peer-to-peer mode where associated drivers and firmware won't initiate any transmission of DFS frequencies without initiation by a master device. On non-DFS frequencies, such as 5150~5250MHz and 5725~5850MHz, device won't be acted as an AP.**

**Product Name: Tablet PC**

**The applicant: Tabletkiosk**

**FCC ID: XHFTK500ABGNTS500**

A handwritten signature in black ink, appearing to read 'Cliff Wu', is positioned above the printed name.
