

Description of Label affixed to CFW-2132 Device

1. Label sample (size 126mm x 25mm)

2. Label Mechanical Construction and Affixment

The labels are constructed from PC9821W material and the information is laser etched into the label.

The label is affixed to the exterior of the CFW-2132 housing using 3M VHB Adhesive Transfer Tape. VHB adhesive transfer tape is appropriate for use in interior and exterior industrial applications to replace rivets, spot welds, liquid adhesives, and other permanent fasteners.

The label is Affixed at device manufacture and is on the exterior of the housing. Labels on the outside of the carton contain the device model and FCC ID where it is available to the purchaser at the time of purchase.
