Columbia, MD 21046

To whom it may concern:

MicroStrain hereby requests a Permissive Change Class II of the radio equipment certification for the SG-Link-OEM certification number, FCC ID: XJQMSLINK0002. This product differs from the originally approved product in the following manor:

- (a) Associated digital circuitry. – The digital circuitry and schematic has remained unchanged from the original product, and radio transmit power levels remain unchanged.
- (b) Functional capabilities. – There are no changes to the functional capabilities for this product from the original.
- (c) Antenna Characteristics. – The antenna has been changed from an embedded surface mounted monopole antenna to an embedded monopole whip antenna.
- (d) Cosmetic differences – The PCB footprint has changed in size from 33 x 31 mm to 21 x 45 mm in order to satisfy a customer's new footprint dimension requirements. All associated digital and schematic has remained unchanged.

I do attest that the Field strength and/or RF Output readings remained the same or are lower than the originally approved product and that they did not increase therefore qualifying this product for this application type.

Sincerely,

A handwritten signature in black ink, appearing to read 'Chris Townsend'.

Chris Townsend
Executive Vice President
MicroStrain, Inc.
