

Instruction book of telecontroller

HS91V12

- A、 Press “OUT” button, green line light works, release, the light goes out.
- B、 Press “IN” button, orange line light works, release, the light goes out.
- C、 working voltage: 12V
- D、 working frequency: 314.98MHz
- E、 drive current: 2-5A

Installation steps:

- 1、 Firstly, check that if the electric appliance works normally. Install it after closing the general power to ensure the safety
- 2、 Please follow the instructions detailedly. Connect the color direction of the line with the right cable to connect
- 3、 Adjust the signal to the best position and fix.
- 4、 Hold down the button when the local switch, IN or OUT, the remote control will launch the corresponding encoded signal, the host will receive the signal corresponding to the open switch, you can work with electrical appliances. Opening up the remote control button, the signal disappeared, do not work with electrical power.
- 5、 The remote control can be used to 12V voltage lights do not need to work long hours, winch motor.
- 6、 For winch motor through winch the main controller, according to IN button on the remote control, the opportunities are to electricity, will be incorporated into the electric winch cable winch drum. By OUT button on the remote control, it will release cable hoist winch drum

ATTENTION:

- 1, Install a receiver , antenna cannot be closed to other lines.
- 2, When the emission Distance weakened or the light goes out, please replace DC : 12V—23A battery
- 3, Please straightened antenna and hang it in the air.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) this device may not cause harmful interference, and
- (2) this device must accept any interference received, including interference that may cause undesired operation.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However,

there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception,

which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
