Subject : Class II permissive change for additional antenna for the RF module bearing

FCC ID.: X0JGA1000

The RF module has been granted certification on Sep. 28, 2009. This module has a built-in onboard antenna located on the module's PCB as shown on photo 1. For marketing reasons, we expect to use an additional external antenna of the model RP-SMA(M), shown on photo 2. This additional external antenna will be used together with the onboard (internal) antenna of the RF module.

We have retested the RF module with the external antenna attached. Please refer to the enclosed test report.

Sincerely,

A handwritten signature in black ink, appearing to read "Dmitry Slepov". The signature is fluid and cursive, with the name written below the main body of the signature.
