Subject: Confidentiality Request

Applicant: TableTop Media
12404 Park Central Dr
Suite 420
Dallas, TX 75251
United States

Gentlemen:

We, TableTop Media, request that the **schematic diagrams, parts lists, system block diagrams, internal photographs and operational descriptions** submitted with the application for certification for XOZIOSK-C03 be withheld from public disclosure as per Section 0.459 of FCC Rules. This request is made under the provisions of Section 0.457(d) of the Commission's Rules, and Section 552(b) (4) of the Freedom of Information Act. These sections authorize withholding from public inspection, material which would be privileged as a matter of law if retained by the person submitting them, and material which would not customarily be released to the public by that person.

The material contains technical data, which would customarily be guarded from competitors.

It is our understanding that the internal photos in the accompanying submission are not normally held confidential long term, and must not have any cans, shields, or covers obscuring any areas of the board. However, due to the fact that our device is used for credit card payment and as such

12404 Park Central Drive, Suite 420 - Dallas, TX 75251

must implement security measures to protect this data, we have designed in features that we would prefer not be disclosed or published in order to prevent anyone from gleaning information that would make it easier to defeat them.

The internal photos included in this submission show the board with all shields and covers removed. This reveals some of the details associated with the security features that, if published, could aid in developing a method to circumvent or bypass these measures.

Therefore, we request that the internal photographs of the device be held confidential long term. This will afford a degree of protection of what we deem sensitive and proprietary information.

Sincerely,

A handwritten signature in black ink, appearing to read 'Viren Balar', written over a horizontal line.
