### 1 Scope

This document provides information on JODY-W1 series modules' label contents and location on the module. It is part of the equipment certification application issued to FCC and ISED.

### 2 FCC/ISED ID reference

Product name	Ordering Code(s)	FCC ID	ISED ID
JODY-W164-A	JODY-W164-03A	XPYJODYW164	8595A-JODYW164
JODY-W164-A	JODY-W164-07A	XPYJODYW164-07A	8595A-JODYW16407A

**Table 1: FCC and ISED IDs for different models of JODY-W1 series modules**

### 3 Label

#### 3.1 Label specification

The labels of JODY-W1 series include important product information as described in this section. The data matrix code for automotive and professional grade variants of JODY-W1 series includes a serial number.

Figure 1 illustrates the sample label of the JODY-W1 series and includes: the u-blox logo, product name (model), type number, FCC and ISED certification number and date of unit production encoded YY/WW (year/week).

**Figure 1: JODY-W1 series sample label**

A detailed description of the label components are listed in Table 2.

Reference	Description
1	Text in bold font: MODEL: type number without the product version
2	Product version (“xxB-yy” for professional and “xxA-yy” for automotive grade)
3	Date of production encoded YY/WW (year/week)
4	FCC/ISED ID which the module has been listed with
5	Data Matrix with unique serial number of 19 alphanumeric symbols. The 3 first symbols represent the unique module type no, the next 12 symbols represent the unique hexadecimal Bluetooth MAC address of the module in the format AABBCCDDEEFF, and the last 4 symbols represent the hardware and firmware version encoded HFFF.
6	u-blox logo, the red dot in the logo is also marking pin no 1

**Table 2: JODY-W1 series label description**

The model name, which is identical to the ordering code, used for product type approval is shown on the first line of the label. Table 3 provides the mapping of ordering code, label contents and FCC/ISED IDs. The marking “yy” in Reference 2 on the label is the minor product version and not relevant for certification.

Ordering code	Label marking			ISED ID
	Ref. 1 (Model: ...)	Ref. 2	FCC ID	
JODY-W164-03A	JODY-W164	03A-yy	XPYJODYW164	8595A-JODYW164
JODY-W164-07A	JODY-W164	07A-yy	XPYJODYW164-07A	8595A-JODYW16407A

**Table 3: Mapping of ordering code, label marking and FCC/ISED IDs.**

### 3.2 Product labels

Figure 3: JODY-W164-07A label

## 4 Label location

The label is placed on top of the shield of the JODY-W1 series modules as shown below (certification IDs not printed on module prototypes, this is just to demonstrate the label location).
