

American Certification Body Inc.
6731 Whittier Ave, Suite C110, McLean, VA 22101, USA

ACB:

In section 4.2.2 of the user manual, I can see that the maximum antenna gain value is stated as "TBD". Does this mean that the user manual is a draft document? If so, please confirm that the correct values will appear in the final document, as per the MPE report.

Applicant:

The document is a draft and the final version will contain the gain from the MPE report.
