RE: Request for Confidentiality Regarding Application for Certification of FCC ID: XSNA01.

To Whom It May Concern:

Pursuant to Sections 0.457 and 0.459 of the Commission's rules (47 CFR §§ 0.457, 0.459), Wearable Inc. hereby requests confidential treatment for documents filed with the Commission in connection with the application for certification referenced above as follows.

**Short Term Confidentiality**

Wearable Inc. requests that the Commission withhold the following documents from public viewing for forty-five days after the date of certification is granted:

- Test Setup Photographs
- External Photographs
- Internal Photographs

Wearable Inc. has not begun to market the device publicly, but plans to do so in the near term; however, these documents reveal technical and design information that has not been publically disclosed and that is protected by Wearable Inc. as confidential and proprietary trade secrets. This information has been disclosed to those required to maintain its confidentiality, and is not customarily disclosed prior to the commercial release of a device. As a result, disclosure of this information by the Commission prior to the commercial release would harm Wearable Inc. by giving competitors an unfair market advantage.

Wearable Inc. believes the period of confidentiality requested is necessary to protect the information until the commercial release of the device.

**Permanent Confidentiality**

Wearable Inc. requests that the Commission withhold the following documents from public viewing indefinitely:

- Schematic Diagram
- Block Diagram
- Operational Description

These documents reveal detailed technical and design information that is protected by Wearable Inc. as confidential and proprietary trade secrets. This information has been disclosed to those required to maintain its confidentiality, and is not customarily disclosed to the public even after commercial release of a device. As a result, disclosure of this information by the Commission would harm Wearable Inc. by giving competitors an unfair market advantage even after commercial release of the device.

WEARABLE INC.
