**Subject:** FCC ID: XV6PST2200

Mr. Fujimoto:

In order for processing of this certification application (FCC ID: XV6PST2200) to continue, the following issue(s) will have to be addressed:

- 1) It is indicated on the application form that confidentiality is requested, which must be accompanied by a confidentiality request letter from the applicant. Please submit this letter.
- 2) Please submit a complete user's manual. The document submitted as the user's manual is the battery replacement procedure.
- 3) According to the battery replacement procedure, this device can be externally powered by a SS 5000 / SS 5200 series thermostat. Was this mode of operation investigated? Also, if the thermostat connects to the AC mains (directly or indirectly), please provide conducted emissions data for this configuration.
- 4) According to the operational description and schematic diagrams, this device can optionally connect to a door switch. Were investigations made for this wiring configuration?
- 5) The schematics indicate two device models (R915H, R915V), each of which uses a different antenna (right angle, straight). Is this application intended cover both of these configurations? If so, were both antennas tested?

The item(s) indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information within 60 days of the original e-mail date may result in application dismissal, and forfeiture of the filing fee. Also, please note that partial responses increase processing time and should not be submitted. Please upload responses and/or exhibits to the electronic filing website. Your correspondence number is XV6PST2200-1.

Best regards,  
Scott McCutchan
