Subject: FCC ID: XV6PST2200

Mr. Fujimoto:

In order for processing of this certification application (FCC ID: XV6PST2200) to continue, the following issue(s) will have to be addressed:

- 1) The user's manual (battery replacement procedure) makes several references to technical notes for installation instructions and technical information. Since the manual does not address the installation and setup instructions, please submit the applicable technical notes.
- 2) If the device cannot be powered externally when in wireless mode, then the note in the manual about powering the device from a thermostat should either be removed, or be modified to make this indication to the user/installer.
- 3) The fact that the door switch option is not supported should be indicated in the operational description, and the user/installer should be instructed not to make this connection.
- 4) Please remove the reference to the un-tested right-angle antenna from the schematics.

The item(s) indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information within 60 days of the original e-mail date may result in application dismissal, and forfeiture of the filing fee. Also, please note that partial responses increase processing time and should not be submitted. Please upload responses and/or exhibits to the electronic filing website. Your correspondence number is XV6PST2200-2.

Best regards,
Scott McCutchan
