1. Important Safety Guideline

Important:

please read this user manual carefully before you begin using the phone and keep this user manual for future use. If you pass the device to a third party, be sure to pass this manual too.

 Non-observance of this manual can result in serious injury or damage to the device.

 Warning: These warning notices must be observed in order to prevent any injury to the user or to third parties.

-Different countries may apply different regulations to the use of mobile phones(eg when driving, hospitals, at petrol stations, in aircraft).Please check the laws on the use of a mobile phone in your country and switch off the phone when usage is not permitted, or when dangerous situations or interference could occur.

- Only use the phone in accordance with its purpose and at locations where telephoning poses no dangers.
- Only use the manufacturer's charger and battery.   Inserting an unsuitable   battery or   inserting the battery incorrectly can result in danger of explosion.The battery must not be opened or exposed to a flame.

- The operation of medical devices might be   affected.   The manufacturers of   pacemakers recommend a minimum distance of   20cm between the devices and phone when the phone is turned on. Do not carry the phone   in your breast pocket.
- If you suspect that there is interference between   the phone and medical device, please consult your doctor   before using these devices together again.
- Keep the phone in a safe place out of children's reach.   It includes small   parts which if detached may cause a choking hazard.
- Do not disassemble this unit. Take it to a qualified service technical when repair work is required.
- The unit should be kept away   from   heat source   such as   radiators or cooker.
- Do   not   use   the   phone at a   refueling   point,   near   fuel or chemical.
- Use dry cloth to clean the unit.   Do not use any solvent.
- Do not keep the phone next to credit card or magnetic transport tickets. It might affect the information on the magnetic strips.

1.1   Safety Notices

If your phone is lost or stolen, please immediately inform your nearest telecommunication department or agent to disable the SIM card, so as to prevent others from using your phone and incurring economic loss to you.

When you contact telecommunication departments or agents, they may need to know the IMEI code of your phone (you can find it on the back label of your phone after removing the battery). Please

write down the code and keep it in a safe place for later use.

For the purpose of avoiding mistaken use of your phone, please adopt precautions such as:

-- Set up the PIN code of your SIM card. The PIN code can prevent your SIM card from being used by unauthorized people.

-- On a trip or travel outside, please do not disclose your phone in public, so as to avoid unnecessary loss. You'd better keep it close to you or lock it in your luggage.

-- Enable call barring.

1.2 Safety Precautions

Before using your phone, please carefully read through these precautions, so as to ensure safe and correct use.

1.2.1 Current Precautions

■ Use only the original or specified accessories. Other products may cause battery leakage, overheat, explosion, or fire.

■ Do not severely bump, shake or throw your phone, so as to avoid faults and fire.

■ Do not put your phone, battery or charger into your microwave oven or other high-pressure devices. Otherwise, it may cause circuit damage or fire.

■ Do not use your phone at places with flammable or explosive gas. Otherwise, it may cause phone faults or even fire disasters.

■ Do not put your phone in places of high temperature, high humidity or a lot of dust. Otherwise, it may cause phone

faults.

■ Please keep your phone away from kids, so as to prevent them from using it as a toy and incurring body injury.

■ Do not put your phone on uneven or unstable tables, so as to avoid phone faults or damages incurred by dropping.

1.2.2 Mobile Phone

■ In places where the use of mobile phones is prohibited, such as planes and hospitals, please shut down your phone, which will influence normal work of electronic equipment and medical instruments. Please follow relevant regulations of these places. This phone offers the automatic power-on function. Please check the alarm settings to make sure that your phone will not automatically power on during a flight travel.

■ Please do not use your phone near to low-signal or high-precision electronic equipment. Radio signal interference may cause false operation or other problems of such electronic equipment. Special attention is required in case of the following devices: hearing aids, pacemakers and other medical electronic devices, fire detectors, auto doors and other auto control devices. For influence of mobile phones on pacemakers and other medical electronic devices, please consult corresponding manufacturers or local distributors.

■ Please do not forcefully knock at the LCD display or use it to knock at any other stuff; otherwise the LCD will be damaged and LCD liquid will leak. If such liquid enters your eye, there will be the danger of blinding. In that case, please use clean water to wash your eyes (do not knead the eyes), and ask for help from the doctor.

■ Do not disassemble or modify this phone; otherwise it may cause damage, electric leakage or circuit malfunction of the phone.

- In rare cases, when being used in cars of certain models, your phone may cause adverse influence on in-car electronic devices. In that case, do not use the phone to avoid the loss of security guarantee.
- Do not use sharp articles, such as pin or pen point to press the keypad. Otherwise, it may damage your phone or cause error operation.
- If the antenna is damaged, please stop using the phone to avoid body injury.
- Keep your phone away from magnetic articles such as magnetic cards, since radiation waves emitted by the phone may clear information stored on floppy disks, value-storing cards or credit cards.
- Keep tiny metal articles such as thumb pins away from the speakers of your phone. Since the speakers have magnetism during operation, it will absorb those small metal articles, and thus cause body injury to the user or damage the phone.
- Keep your phone away from water or other liquids, which may cause short-circuit, electric leakage or other malfunctions of your phone.
- Phone shall only be connected to a USB interface of version 2.0 or higher.

1.2.3 Battery

- Do not throw the battery into fire; otherwise it may cause fire or explosion.
- In packing the battery, do not impose excessive force; otherwise it may cause leakage, overheat, explosion or fire of the battery.
- Do not use electric wire or pins to cause short circuit of the battery; do not put the battery together with metal stuff including necklaces; otherwise it will cause leakage, overheat, explosion or fire of the battery.
- Do not solder the contacts of the battery; otherwise it will cause leakage, overheat, explosion or fire the battery.
- If liquid within the battery enters the eye, there will be danger of blinding. In that case, do not knead your eyes with your hand; use clean water to wash your eyes and then ask for help from the doctor.
- Do not disassemble or modify the battery; otherwise it may cause leakage, overheat, explosion or fire of the battery.
- Do not use or place the battery near to high-temperature places such as fire or heaters; otherwise it may cause leakage, overheat, explosion or fire of the battery.
- If the battery encounters abnormal temperature rise, color change or distortion during the curse of use, recharging or storage, please terminate the use and replace it with a new one.
- If leaked liquid from the battery touches your skin or clothes, it may cause skin burn. In that case, please immediately use clean water to wash and ask for help from the doctor if necessary.
- If the battery leaks or emits unusual odor, please immediately keep it away from flamed fire to avoid fire or explosion.
- Please avoid the battery being affected with damp; otherwise it may cause overheat, smoking or erosion of the battery.
- Please do not use or place the battery in high-temperature environment such as direct sunlight; otherwise it may cause leakage or overheat of the battery, and may decrease its performance and shorten its lifespan.
- Do not recharge the battery for over successively 24 hours.

1.2.4 Charger

- Please use a 100-240V AC power supply. Other voltages will cause electric leakage, fire or damage to your phone and charger.

- It is strictly forbidden to cause short circuit of the charger; otherwise it will cause electricity shock, smoking or damage of the charger.

- Do not use the charger in case its power cable is damaged; otherwise it will cause fire and electricity shock.

- Please clean dust on power sockets as soon as possible.

- Please do not put containers with water beside the charger, so as to avoid short circuit, electric leakage or other malfunctions incurred by spilled water.

- If the charger touches water or other liquids, cut off the power supply immediately to avoid short circuit, fire, electricity shock and malfunctions of the charger.

- Please do not disassemble or modify the charger; otherwise it will cause body injury, electricity shock, fire or damage of the charger.

- Please do not use the charger in high-humidity places such as bathrooms; otherwise it may cause electricity shock, fire or damage of the charger.

- Do not use your wet hand to touch the charger, wire or power socket; otherwise it will cause electricity shock.

- Do not put heavy stuff on power cable or modify them; otherwise it will cause electricity shock or fire.

- Before cleaning or maintenance, please remove the plug of the charger from the power socket.

- When removing the plug, please grasp the charger. Pulling the power cable may damage the cable and incur electricity shock or fire.

- The socket-outlet shall be installed near the equipment and shall be easily accessible.

1.2.5 Cleaning& Maintenance

- Do not use your phone, battery and charger in places with high humidity such as bathrooms, and also keep them away from raindrops.

- Please use soft, dry cloth to clean your phone, battery and charger.

- Do not use chemical reagents such as alcohol, thinner or benzene to clean your phone.

- Dusty power socket may cause bad contract and power failure, so as to incur recharging failure. Please clean the power socket regularly.

- 1.2.6 Generic Precautions

Mobile Phone：

- Please use your phone under the circumstances as follows: temperature: -10℃ to -50℃ and humidity: 35%~85%.

- Please do not use your phone near fixed phones, TV sets, radio sets and office automation equipment, so as to avoid influence on effect of such devices as well as your phone.

Battery：

- Please keep the battery in cold places with good ventilation and without direct sunlight.

- Lifespan of the battery is limited, and its use time will be shortened after frequent charging. When the battery fails to function after multiple times of charging, it may come to the end of its life, when please replace it with a new one of the same model.

- Do not litter used batteries with ordinary garbage. Where there are explicit regulations on the disposal of used batteries please follow the instructions of such regulations.

Charger：

- Do not charge your battery under the following circumstances: places with direct sunlight; external temperature under -10℃ or over 50℃; places with heavy humidity, dust or vibration (potential fault causes); near to electric appliances such as TV sets and radio sets (adverse impact on video/audio effect).

6. **Setting Phonebook**

Quick search   Input the initial letter of the contact you
                                              want to search

Add new contact   Select SIM card or Phone
                                 Press "Left soft key" to enter the Name
                                 Press "Left soft key" and   select "done"
                                 Go to Number and enter the number
                                 Press "Left soft key" and confirm "save"

Copy all   You can copy all entries from SIM card
                                 memory to Phone memory and also from
                                 Phone memory to SIM card memory

Delete   You can delete the contact from Phonebook

Caller groups   You can group your contacts in record
                                 from the Phone with selected ringtone

Settings   Go to "Memory Status" to view the
                                 memory status of SIM card or the Phone

                                 Go to "Name list filter" to select from
                                 SIM card memory or from the phone
                                 memory when you quick search the
                                 contact

7. Message

Write message
Input your message and confirm "Done". You can select "send" Enter the phone number or search from your phonebook

Inbox   You will be alerted when you have received a
             message. Go to read the message from Inbox

Outbox   View your sent messages

Drafts   This menu stores messages you have saved to send at a later time.

Templates   There are some pre-defined message in the list.
             You can view and edit the template message or create new messages.

Text message counter
This menu shows the list of messages sent and received

Text message settings
Profile settings is set according to your SIM card
Common settings -Delivery report:set the network to inform
you when your messages have been delivered
Common settings -Reply path:allow recipients to reply to you
through SMS server.

Voice mail server
This menu provides you with a quick way of accessing your voice mailbox (if you have this service from the network)

Broadcast message
Broadcast message are text messages delivered from the network operator to your handset.   You can go the this menu
to enable or disable it.

8. Call Log

Missed calls   View the last 20 unanswered calls

Dialled calls   View the last 20 outgoing calls

Received calls   View the last 20 incoming calls

Delete call logs   Delete any call logs in record

Call timers   View the duration of your incoming
            and outgoing calls

**Call cost**   View the cost of calls if it's provided
            by the network

9. Care

9.1 Speed Dial

 Go to "Speed Dial" menu
 Press "Left soft key"
 Input the phone number and confirm OK.
 You can input maximum 3 Speed Dial settings and make a quick call by pressing
 M1, M2 and M3.
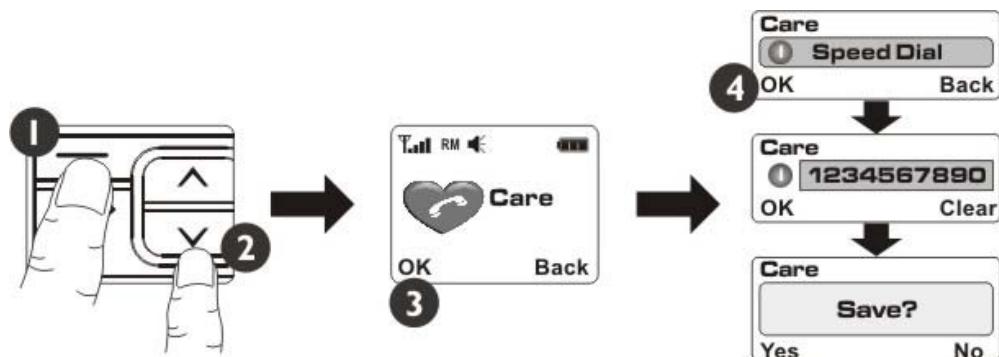

9.2 Emergency Call

Go to "Emergency Call" menu

Press "Left soft key"

Input the phone number and confirm OK.

You can input maximum 5 SOS help list that you are sure they can provide help to you when you are in emergency.
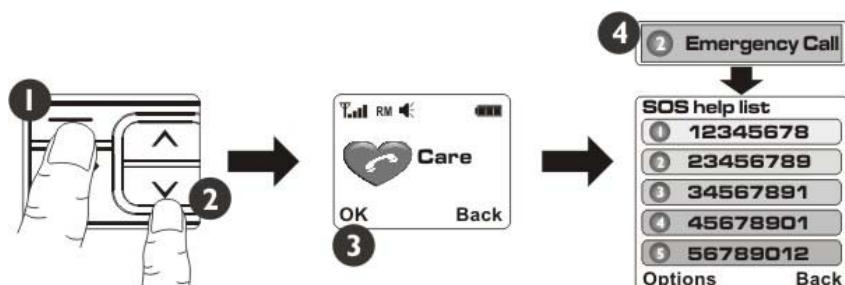

When the phone is idle and you press "SOS" button, the phone will activate the SOS function. The phone will ring and send "SMS" to preset 5 contact, then it will automatically dial the first preset contact.

If the first phone number is busy or no one answers, the phone will start calling 2nd, 3rd, 4th, & 5th sequentially until one of the helpers is connected. Between each cycle, the mobile will wait for a few minutes and activate the alarm to alert other persons in the close area to help the user.

During the operation, the user can cancel the SOS calling by press "Right soft key" to abort.

After you input the SOS contacts in the phone, the contacts will   receive a   SMS to acknowledge your contacts for the SOS registration.   If you remove the contact from the SOS list, the phone will send SMS to notify the SOS deregistration.

9.3 Fall detection-SOS service

Fall detection-SOS service detects accidental fall of the user. When the user experiences accidental fall, the phone can trigger the automatic dialing   to preset SOS contacts.

RF Exposure Information and Statement

The SAR limit of USA (FCC) is 1.6 W/kg averaged over one gram of tissue. Device types CS9133 (FCC ID: XWE-CS9133) has also been tested against this SAR limit. The highest SAR value reported under this standard during product certification for use at the ear is 0.313 W/kg and when properly worn on the body is 0.495 W/kg. This device was tested for typical body-worn operations with the back of the handset kept 1.5cm from the body. To maintain compliance with FCC RF exposure requirements, use accessories that maintain a 1.5cm separation distance between the user's body and the back of the handset. The use of belt clips, holsters and similar accessories should not contain metallic components in its assembly. The use of accessories that do not satisfy these requirements may not comply with FCC RF exposure requirements, and should be avoided.

This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

NOTE: The manufacturer is not responsible for any radio or TV interference caused by unauthorized modifications to this equipment. Such modifications could void the user's authority to operate the equipment.
