

Transmitter Preparation

Reverse Switch Servo Factory Settings

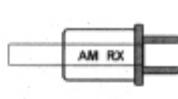

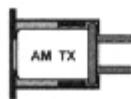

Antenna

Extend the antenna to the maximum length for best performance.

AM 26 MHz Transmitter Crystal (TX)

AM Transmitter crystal (TX) AM Receiver crystal (RX)

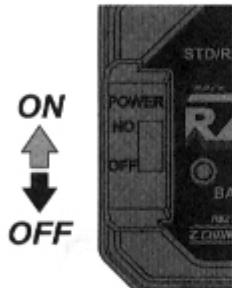

The crystal must be replaced to change frequencies.
Note: You must also change receiver crystals!
Do not use FM crystals

STD/R Steering Dual Rate

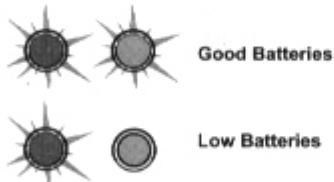

To be used to adjust steering servo rate and range.

Power Switch

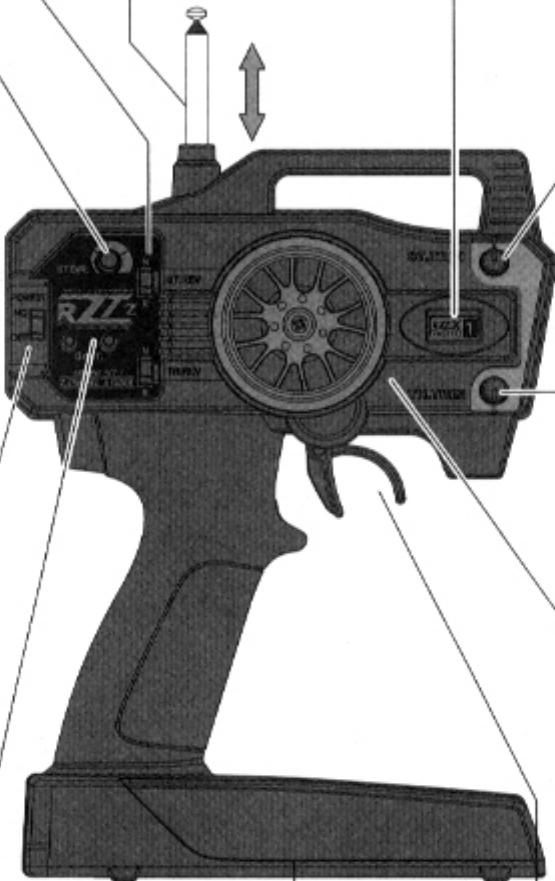

Battery Level Indicator

Good Batteries

Low Batteries

Steering Trim

To be used for trimming the steering operation.

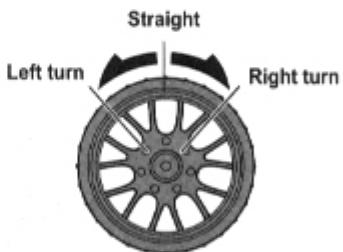

Throttle Trim

To be used for trimming the throttle operation.

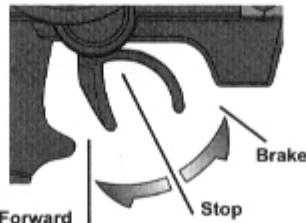

Steering Wheel

To be used for steering operation.

Throttle Trigger

To be used for throttle operation.

Transmitter Battery Installation

Open battery cover at the bottom of transmitter.

Install batteries. Follow the direction of batteries designated in the inside of battery box.

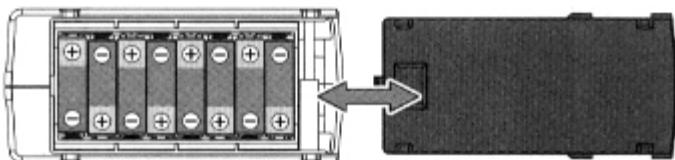

Attention

Do not mix batteries of different ages or types.

8X AA Alkaline Batteries

Battery Cover

stinger

FCC STATEMENT

1. This device complies with Part 15 of the FCC Rules.

Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and

(2) This device must accept any interference received, including interference that may cause undesired operation.

2. Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

FCC ID: XY4RZT

This device complies with Part 15 of the FCC Rules.

Operation is subject to the following two conditions:

(1) This device may not cause harmful interference,

and (2) This device must accept any interference

received, including interference that may cause

undesired operation.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
