Clarification Letter

Reference: FCC email from October 1st 2015 regarding: Inconsistencies between marketing material and FCC application (Correspondence reference number: 214831).

Attachment: TVWS Brochure 4GTVWS-2-1

Dear Sir,

This letter is in response to the referenced correspondence regarding FCC ID: XYMBTSTVWS-1, APPLICANT: Runcom technologies Ltd., Form 731 Confirmation Number: TC656103

Runcom apologize for the mistake it did by distributing marketing material inconsistency with the FCC application. The mistake was caused by not clarifying in the brochure we used in the past that some new features that are in Runcom's roadmap are still FCC approval pending. Immediately after Runcom was aware of the problem, Runcom performed the following corrective actions:

- 1- Replaced the brochure with a brochure that is consistent with the FCC application (see attached)
- 2- Stopped the distribution of the inconsistent brochure.
- 3- Informed all its distributors, resellers and representatives in the US to destroy the inconsistent brochure and use only the consistent brochure.

Runcom can assure that no TVWS systems will be supplied to customers in the US that are inconsistent with the FCC application.

In regards to the question about the TVWS CPE, Runcom can confirm the CPE is currently undergoing FCC testing at ITL Laboratories and the target is to complete the certification before end of 2015 (This fact is mentioned in the brochure as well). The CPE functions as a standard broadband wireless access terminals (TVWS adapted WiMAX technology), The CPE connects with the TVWS Data Base through the TVWS Base Station and the AFAS (Automatic Frequency

—Runcom Proprietary and Confidential—

Allocation Software) System.

We are certain that the inconsistency problem is resolved and that this new TVWS solution will be able to provide reliable and affordable broadband connectivity to underserved residents in rural America that are waiting for such a solution.

Runcom will be honored to provide any further clarifications if required.

Sincerely,

Israel Koffman
