Peripheral to Digital Device

Our client's product with the above listed product identification is a transceiver USB dongle with integrated infrared booster for TV set top boxes. It is only to connect to the USB port of the Set Top Box: It cannot be connected to a computer for communications.

The device meets the classification for a peripheral to a digital device - not a peripheral to a computer - so verification for Part 15 B is sufficient.

If you have any questions, please feel free to contact me at the address shown below.

Yours sincerely,

Thomas Ring
