# 1 Outlook Description

## Positive

## Left side

## Right side

---

## 2 Turn on/off the device

**Turn On:** Plug in the power adapter, turn on the machine automatically

**Turn Off:** When the battery don't have enough power, the device will automatically shut down

---

## 3 The charging and power supply of the device

### Charge the device

- Plug the power adapter into an electrical wall outlet named DC, and then connect to the device to fully charge the battery before use (approx. 4hours).
- While charging, the battery indicator light is red.

☆ *The light indicator is covered by the back shell, user can't see its change state. User can see equipment's charge and discharge status by the battery option in Settings.*

### Power supply of the device

Connect one of the two big USB ports on the left side of the device and the device which is to be charged by a piece of USB cable, you can supply power to the external device directly

When charging the device , it can also supply power to the external device by one of the big USB port on the base

☆ *You cannot charge the battery using the USB cable.*

☆ *You can use the device while the battery is charging.*

☆ *If you want supply power to the external device by one of the big USB port on the base, you must plug in the power adapter*

---

## 4 Touch-Screen Navigation

The touch-screen allows for quick, easy and convenient navigation for all applications.

Throughout the User Guide, you are instructed to use the following tap or touch navigation

methods:

**Tap:** quick tap & release on an item on the screen.

**Finger slide:** touch & slide your finger across the screen and then release.

**Touch & hold:** touch and hold in place approx 2 seconds, and then release to display an options window.

*Note:*

*To avoid scratching or crushing, do not place objects on the touch screen surface.*

---

## 5 Wi-Fi network settings

### Connecting to Wi-Fi networks

1. Press **Settings** -> **Wi-Fi**
2. Check **Wi-Fi** item on the top of the screen to turn it on
3. Touch a network to connect to it

*Note:*

- *If the network is open, you are prompted to confirm that you want to connect to that network by touching **Connect**.*
- *If the network is secured , you're prompted to enter a password or other credentials. (Ask your network administrator for details.)*
- *If your Wi-Fi network is set as hidden, it won't be found by the auto scan. Tap “+” on the top of the screen and follow the prompts to add your network*

### Add a Wi-Fi network

1. Turn on Wi-Fi, if it's not already on.  
If you're adding a Wi-Fi network when first setting up your device, Wi-Fi is turned on automatically.
2. In the Wi-Fi settings screen, touch **Add network** (at the top of your screen).
3. Enter the SSID (name) of the network. If the network is secured, touch the Security menu and then touch the type of security deployed on the network.

4. Enter any required security credentials.
5. Touch **Save**.

The device connects to the wireless network. Any credentials that you entered are saved, so you are connected automatically the next time you come within range of this network.

## Forget a Wi-Fi network

You can make the device forget about the details of a Wi-Fi network that you added—for example, if you don't want the device to connect to it automatically or if it is a network that you no longer use.

1. Turn on Wi-Fi, if it's not already on.
2. In the Wi-Fi settings screen, touch & hold the name of the network.
3. Touch **Forget** in the dialog that opens.

## Wi-Fi Settings screen

In addition to the settings described in this section, you can press **Menu** and Advanced Wi-Fi settings as described in “**Advanced Wi-Fi**”

- **Wi-Fi**

Check to turn on Wi-Fi so you can connect to Wi-Fi networks. When connected to a network, displays the network's name.

- **Wi-Fi networks**

Displays a list of Wi-Fi networks you've previously configured and those detected when the device last scanned for Wi-Fi networks.

- **Add Wi-Fi network**

Opens a dialog where you can add a Wi-Fi network by entering its SSID (the name it broadcasts) and security type.

## Advanced Wi-Fi settings screen

- **Network notification**

Check to receive a notification when an open Wi-Fi network becomes available.

- **Keep Wi-Fi on during sleep**

Opens a dialog where you can set whether and when the Wi-Fi radio disconnects. Disabling sleep uses more battery power.

- **MAC address**

The Media Access Control (MAC) address of your device when connecting to Wi-Fi networks.

- **IP address**

The Internet Protocol (IP) address assigned to the device by the Wi-Fi network you are connected to (unless you used the IP settings to assign it a static IP address).

---

## 6 Application Management

### Install Android Applications

Purchased or free Android applications that you have downloaded to your computer can be installed quickly & easily on your Tablet using the  **Apk Installer** application.

1. Copy the **.apk** files that you want to install onto a SD card or USB device, → insert or connect to your Device.
2. Tap the  **ApkInstaller** application icon.
3. Tap **Install** and locate the folder (**Internal Memory** or **TF Card**) in which the .apk application files were saved.
4. Tap on a **.apk** file → **Install**.  
The application is installed and the application icon is added to the **Applications** screen.
5. Tap **Open** to launch the application now, or tap **Done** to return to the **ApkInstaller** screen.

### Download Android Applications direct from a Website

You can download Android applications directly from websites, and then quickly and easily install them on your device.

1. Tap the  **Browser** application icon to launch the internet browser.
2. Enter the desired website URL, and tap the **download** link for the application you want to install on your device.
3. After the download is complete, touch & hold on the download file (in the **Download history** screen), → tap **Open** → **Install**.

## Uninstalling Android Applications

You can also quickly and easily uninstall the Android applications that you have installed.

1. Press **Settings** → **Applications**
2. Tap the application you want to uninstall, → **Uninstall**.
3. Tap **OK** to confirm the Uninstall.

You can also use **ApkInstaller** to uninstall the Android applications

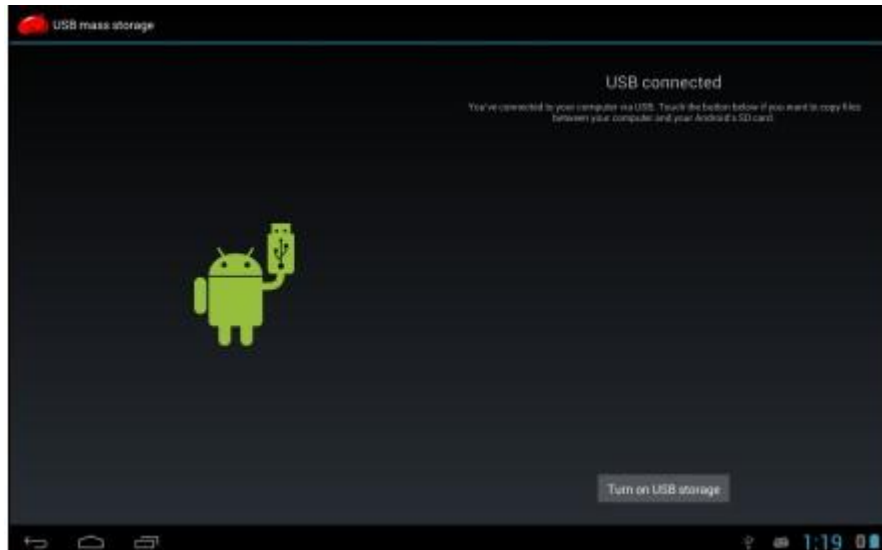

1. Tap the  **ApkInstaller** application icon.
2. Tap **Manage**
3. Tap one **.apk** from the application list and tap **Uninstall**
4. Tap **OK** to confirm to uninstall the **.apk**

---

## 7 USB Storage

### USB mass storage

Connect your PDA and your computer with a piece of USB cable, and click on the USB icon on the status bar, then the following window will pop up:

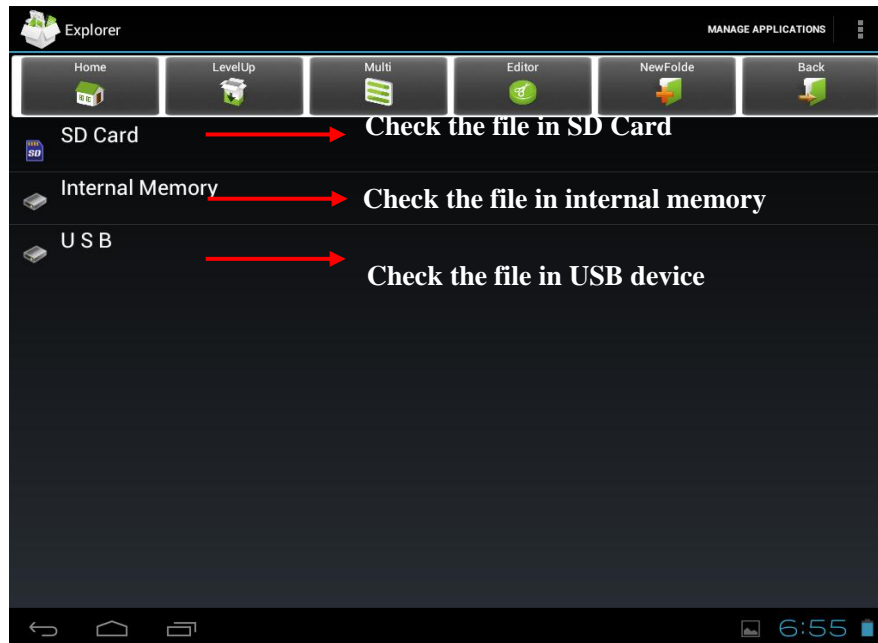

Click on **Turn on USB storage** button, the mass Storage disk will be on the list of **Removable storage devices** of your computer. You can **add** ,**delete** or **modify** file on the mass Storage disk.

## USB disk

Connect the USB disk and your PDA with a piece of OTG, then open **Explorer** →**USB**, you can read the information in your USB disk . You can also do other operation according to the following tips

Tap the **Explorer** application icon to view the files on all storage devices (*Internal memory, SD card, USB*), and to quickly & easily install Android application on your Tablet.

## Functions of icons introduction

Display the root directory of Explorer

Go the parent directory of the current folder

Tap it once, you can multi select the items displayed

Tap it to do some operation for the selected item, such as copy, delete, move, paste, rename.

Tap it to build a new folder

Tap it to go to the previous page

Tap it to go to the next page

## Delete files

Tap and hold on the folder/file you want to delete, → tap **Delete**

## Install android application

Use **Explorer** to install android application. Before doing this please copy the **.apk** files into SD card or your internal memory.

1. Tap the  **File Browser** application icon to view the files
2. Tap one **.apk** that you want to install on your devices

---

## 8 HDMI

### Turn on HDMI

Before using the HDMI ,please make sure you have turned on your HDMI button:  
**Settings->HDMI -> Turn on HDMI.**

### HDMI connecting

Connect your PDA and multimedia TV with a piece of suitable HDMI cable, then the information on your PDA will display on the TV. All operation you do on the PDA will display on TV Synchronously, the voice output from the TV.

### Settings

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

RF exposure compliance with any body-worn accessory, which contains metal, was not tested and certified, and use such body-worn accessory, should be avoided.

The USB cable with a core (manufacturer: SHENZHEN JINGWEICI ELECTRONICS CO.,LTD

; model number: F5B RH 12\*20\*5.6) should be used with this product always.

changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. End user must follow the specific operating instructions for satisfying RF exposure compliance. This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.

The portable device is designed to meet the requirements for

exposure to radio waves established by the Federal Communications

Commission (USA). These requirements set a SAR limit of 1.6 W/kg

averaged over one gram of tissue. The highest SAR value reported under

this standard during product certification for use when properly worn on the body is 0.578 W/kg.
