Brief Introduction to MW0811 Principle

—— MW0811 is built in a ROCKCHIPS RK2818 processor, with 256MB / 512MB memory to run program, optional 2GB / 4GB / 8GB / 16GB / 32GB disk capacity, supporting external TF card up to 32GB.

—— MW0811 is designed with a 8 inches 800 × 600 LCD display, resistive touch screen, man-machine interface design.

—— MW0811 is built in a power control IC to manage charging by a lithium ion polymer battery, charged by an adaptor through a DC - IN socket.

—— MW0811 can connect to the Internet.through a Wi-Fi module wirelessly.

—— MW0811 is built in 3.5cm earphone interface, audio files will decoded by CPU then converts to audio analogue signal by audio IC, finally output voice by earphone or built in speaker

——MW0811 comes with a USB port connects to a computer, an OTG socket to be used in connection with USB devices.
