

RF Exposure Statement

1. Standard Applicable:

According to 1.1307(b)(1), system operating under the provisions of this section shall be operated in manner that ensure that the public is not exposed is not exposed to radio frequency energy level in excess of the Commission's guideline.

This is a portable device.

2. Measurement Result:

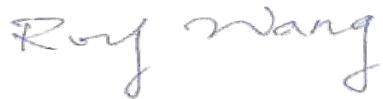

This is a portable device and the max average output power is $6.78\text{dBm} = (8.31\text{mW})$

The antenna gain of the device is 1.2dBi .

The EIRP of the device is $6.78 + 1.2 = 7.98\text{dBm} = 9.02\text{mW}$

Lower than low threshold $60/\text{f GHz} = 60/2.4755 = 24.237\text{mW}$

The SAR/MPE measurement is not necessary.
