Declaration of similarity

With this document we declare that the devices named as SC14SPNODE and SC14CVMDECT are similar in hardware design, Bill of Material, form factor and RF performance. This means that the components used in these products, the printed circuit boards and the metal can shielding are identical. (Manufacture, size, values and tolerances). Both devices are using system software with the same software settings for RF performance. These settings are part of the system software (stack). This system software is managed, provided and tested by Dialog.
