## Request for Supercede

**To: Federal Communication Commission**

Please kindly be notified that we, **Quintet Digital Corporation** Herein request to supersede the FCC ID: **YAAC35010** for the following reason:

We now consider the device both portable and mobile, that it meets the RF exposure (SAR) exemption limits, and itself will not require SAR since it is below the SAR thresholds.

So we would like to update the application to show it is compliant to both mobile and portable requirements which involves updating FCC ID: YAAC35010. There are only 2 exhibits that required to be updated

1. We request to supersede the user manual, we cancel the sentence on page 6 of user manual about separation 20cm distance limit.
2. We add the RF Exposure Statement as FCC requirement for portable device to show it is below SAR thresholds.

Please kindly permit the supercede and update.

Thank you.

Sincerely,

Calvin.Lin / CEO

Quintet Digital Corporation.
