

## Transmitter WTTX201 Circuit Description

U2 NPX1, a built-MCU pressure sensor, when detected the pressure above 1.4Bar, MCU let RF Transmitter work, and send detected air pressure data to RF Transmitter TDK5110F. TDK5110F is a FSK Transmitter, frequency range is 433.92-434.02MHz, and output power is 10dBm. Meanwhile, information was transmitted by antenna.
