## Transponder unit GIITR10525A or GIITR10525B.

Can be included in a system article number GII-10525-1A or GII-10525-1B. A transponder unit is used against an active A or B unit and **has no radar unit built in**. This is only used against a wall or a track end for an active A or B unit to be able to calculate distances to the transponder unit.
