

## Test Setup Photo

Test Setup	Radiated measurement for below 1 GHz (Front side)
	
Test Setup	Radiated measurement for below 1 GHz (Rear side)
	

Test Setup	Radiated measurement for Above 1 GHz (Front side)
A photograph showing the front side of a white rectangular device under test. It is positioned on a black rectangular base in a large anechoic chamber. The chamber walls are covered with a grid of white and black rectangular panels. A laptop is connected to the device, and a measurement horn antenna is positioned to its right. The floor of the chamber is marked with a yellow and black hazard line.	
Test Setup	Radiated measurement for Above 1 GHz (Rear side)
A photograph showing the rear side of the same white rectangular device. It is positioned on a black rectangular base in the same anechoic chamber. The measurement horn antenna is now positioned to the left of the device. The chamber walls and floor markings are consistent with the front side setup.
