

RED EPIC

Label Location Attestation

The entire label cannot be placed on the unit due to space constraint. The sides and top of the camera can be removed to attach accessories by the customer, because of this functionality it won't allow the label a location to be permanently attached. The front and back of the camera allows the customer to attach modules that would cover the label. The only location that would not be covered or removable is the bottom of the enclosure which also has space constraints from the tri-pod mounts only allowing a small area for the label. The statement will be included in the user's manual in instead of on the label.
