RE: Declaration of Compliance to RF Exposure Limits for Humans

Vaddio transceiver

## RF Exposure Statement

**1. Standard Applicable**

According to 1.1307 (b)(1) and IC RSS-102, systems operating under the provisions of this section shall be operated in a manner that ensures that the public is not exposed to radio frequency energy levels in excess of the published guidelines.

This is a portable device operating in 2408-2476 MHz range.

**2. Measurement Result:**

This is a portable device and the ERP is  $6.94 \times 10^{-3}$  W. This is lower than low threshold 60/f GHz mW (24 mW),  $d < 2.5$  cm, general population category.

The SAR measurement is not necessary.

ATTESTATION: I attest that the radiocommunication apparatus meets the exemption from the routine evaluation limits in Section 2.5 of this standard; that the Technical Brief was prepared and the information contained therein is correct; that the device evaluation was performed or supervised by me; that applicable measurement methods and evaluation methodologies have been followed; and that the device meets the SAR and/or RF field strength limits of RSS-102.
