ThermaCELL FootWarmers

Operating Instructions

1. To charge both soles (both soles must be charged at the same time):
    a. Plug the charger into a wall outlet. The Green light on the charger will turn on.
    b. Connect both charging plugs on the charger to the charging sockets at the back of the soles. Make sure that the On/Off switch at the back of both soles is in the "Off" position (move switch position to the left).
    c. The light on the charger will turn red.
    d. Charging is complete when the light on the charger turns green.
2. To activate the soles:
    a. Turn the On/Off switch on the soles to the On position (move to the right).
    b. Press the button and release. The left most light (red) on the remote will turn on to indicate the remote is on the Standby setting.
    c. Press and release the button on the remote to move through the temperature settings (Standby, Medium, High).
    d. In Parallel, the LED light on the soles (to the left of the switch) will blink.
        i. One blink indicates Standby
        ii. Two blinks indicate Medium
        iii. Three blinks indicate High
    e. The lights on the sole should blink continuously when in use.
3. To turn off the soles:

a. Turn the switch on the soles to the Off position.
