

RADIO CONTROL INSTRUCTIONS

● FUNCTION

Radio remote control for electric winch and hydraulic winch

● SPECIFICATION

| | |
|-----------------------|--------------------|
| Transmitting power | $\leq 10\text{mW}$ |
| Operation current | $< 5\text{mA}$ |
| Operating voltage | 8--12V |
| Operating temperature | -20--60°C |
| Protection level | IP54 |
| Operating distance | $< 15\text{m}$ |

● INDICATOR

| | |
|-----------------------|------------------------|
| Red light indicator | the backward operation |
| Green light indicator | the forward operation |

● OPERATION

Turn the button of control handle to IN position, the green light shows forward operation; turn the button of control handle to OUT position, the red light shows backward operation.

● BATTERY

Change the battery when the light is dark, the battery type is 12V GP23A.

● Cable control

When the problem occurred on the radio control system or the battery has no power, connect the control handle and winch with cable to operate winch by cable control.

● NOTE

Be careful to avoid the control handle falling into water.

Be careful to avoid the heavy object press the control handle button, it may cause the mis-operation.

Be careful to avoid the control handle falling into fire, it may cause the battery explosion.

FCC STATEMENT

1. This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference.

(2) This device must accept any interference received, including interference that may cause undesired operation.

2. Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.

- Increase the separation between the equipment and receiver.

- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

- Consult the dealer or an experienced radio/TV technician for help.
