

EXHIBIT 4 - TEST SETUP PHOTOGRAPHS

Conducted Emission Test Setup*	 A photograph showing a conducted emission test setup. On the left, a spectrum analyzer sits on a wooden bench. A red cable connects it to a power line interface unit (PLI) on the floor. The PLI is connected to a power strip on the wall. To the right, a wooden table holds a black device, possibly a power supply or a test unit, with various cables connected to it.
Radiation Emission Test Setup (Below 30MHz)	 A photograph of a radiation emission test setup. A white, rectangular test chamber is mounted on a metal stand. The chamber is surrounded by a large, white, curved structure that appears to be a shield or a waveguide. The floor is made of concrete tiles, and there are yellow and black striped safety markings on the floor.

**Radiation Emission Test
Setup (30MHz to 1GHz)**

**Radiation Emission Test
Setup (1GHz to 18GHz)**

**Radiation Emission Test
Setup (Above 18GHz)**

*** Means' only test and setup for PART 15C .**
