RE: Change in identification of equipment

To whom it may concern:

Cutting Edge Industrial Design, Inc. is requesting a change from original FCC identification L2V-STX2-1 granted on 10/28/2005 to be changed to YHUGL2100.

The equipment has not been altered in any way from the original application and the device is electrically identical to the original device. The original test results are representative of the original equipment.

If you require further documentation, you may contact me at:

Garry Vinje  
Cutting Edge Industrial Design, Inc.
